Raghavan R

Java | SQL | React

Chennai, Tamil Nadu, India

Summary

Hi, I'm Raghavan, a fresher from Chennai passionate about building impactful and scalable software products.

I bring strong skills in Java, Spring Boot, PostgreSQL, and Data Structures & Algorithms (DSA), with hands-on experience developing backend and frontend systems.

I actively sharpen my problem-solving skills through consistent LeetCode practice and I'm expanding into full-stack development with React, JavaScript, and modern frameworks.

I'm eager to contribute as a Software Developer / Backend Engineer / Full-Stack Developer, where I can apply my technical expertise, learn from real-world challenges, and grow with high-impact product teams.

Experience

ShootUp

React & PHP Intern

October 2025 - November 2025 (2 months)

Chennai, Tamil Nadu, India
